

THE ALCHEMIC TABLE

Terracotta tableware collection

Eating is a necessity, is a ritual and a human pleasure. With this collection I wanted to give a meditative and mystic moment during the meal time.

While you eat you can also nourish yourself with the energies of the sacred mountain, with alchemical symbols and colors. You can eat and feel the energies of all the stars, comet, moons, sun, rainbow ...

I add the numbers to synthesize the human comprehension of the huge cosmos.

Each number as a profound meaning, that you can search in the numerology studies and tarots of Marseille. The moment of the meal will become a game between diners and a infinite study.

The Universe love you always.

I made this collection in the Puglia region in Italy, famous for pottery and red clay "terracotta".

The Alchemic table collection is made for you.

*Together we honour life, nature, beauty and open the doors
to inspiration and creation*

After each design is sketched, it is then transformed and welded into an intricate wire structure by the jewelers who work at the Atelier in Bogotá. The structures are then flown to Usiacurí, a small town in the Atlantic to be woven by a community of artisans who patiently give shape and color to each piece using ancestral artisanal techniques taught them by their elders. Each piece is carefully hand woven in natural palm leaves and takes around 8 to 16 hours to complete. It is truly a work of love.

Every day the alliance with this community is strengthened and today we have over 200 artisans and their families working on our collections. Each order you make contributes greatly to our purpose of keeping ancestral artisanal techniques alive, supporting this community and co-creating with them by exchanging knowledge. We are proud to share with you the talents of this big family we call our tribe.
